 - Presets recording for PTZ cameras
 - Additional zoom in the image

A multi-protocols
and open software
made to fit your
needs and uses

Digipryn® : Multi-uses, Efficient, Secured

FLEXIBILITY

Digipryn® is a tool that offers a unique flexibility of use and set up. Each video input is customizable and independent.

VERSATILITY

It is not just a recorder. Digipryn® is versatile: tracking, tempering alarm, intrusion detection, restricted area crossing, flow analysis, audio, IP device management...

DISPLAY

Digipryn® allows up to 15 monitors displayed simultaneously for an optimal management.

MULTI-BRANDS

Digipryn® can be used with all types of cameras, regardless of their brand. Cameras' administration and configuration are available from the interface: presets, brands management, masking, private areas, virtual PTZ, etc. It is also easy to connect with alarm panels and automation systems from the market.

MOBILITY

In a constantly evolving world, Digipryn® offers the possibility to check your video system directly on your smartphone with Pryn-pocket®, or even on your computer with Digipryn.net.

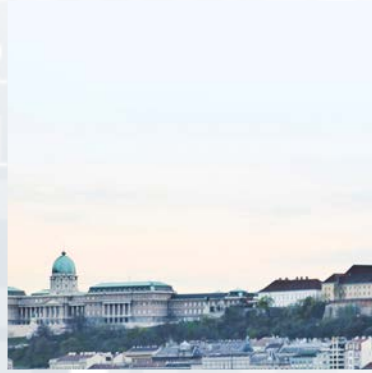

ERGONOMY

Digipryn® offers a flexible graphical interface adapted to the user. The GUI has been designed to be easy to use uncompromising the software's capabilities.

Several Intelligent Functions & Options

HEATZONE

Understand and analyze flows and points of interest recorded by your cameras.

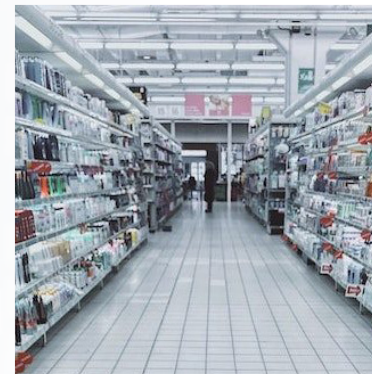

HEATMAP

Get an overview with a global vision of the Heatzones showed on a map.

ANPR

Access control or vehicles search.

PRYNPLAY

Combine security and communication contents to protect and promote.

PRYNLINE

Monitor lines occupancy rates and be alerted if they are overcrowded.

INTRUSION

Detect intrusions. A solution that can be enhanced with artificial intelligence: GO'IA® (intrusion, analytics...).

AND MANY MORE

- Counting
- Waiting time
- Rush hour
- etc.

Enhance your Experience

GAIN IN INTERACTIVITY PRYNPAD

Real interactive monitor, Prynpad is the next logical step for video surveillance and video analytics.

Suitable for touchscreen tablets, the software combines within a single interface: cameras view mode, statistical data display and a Panic Button.

Prynpad is a tool conceived to support the operational activities.

Enhance your Experience

GAIN IN INTELLIGENCE GO'IA®

Artificial intelligence improves analysis veracity and considerably reduces the risk of false alarms. Directly integrated or in addition to your Digipryn®, GO'IA® will transform the way you work.

Digipryn[®] is also a Hardware Solution

A SEDENTARY SOLUTION

- IP or Multi-Hybrid (IP/CVBS (PAL & NTSC)/CVI/AHD/TVI)
- Up to 100 caméras
