

TUB CAMERA®

Continual Technology Improvement

10 ANS
WARRANTY¹

Proven for many years, the TUB camera® system is guaranteed by a 10-year manufacturer's warranty!

More quality with a new Full High Definition model and ultra-sensitive camera

More peace of mind with a 10-year warranty

More security with its odometer, automatic emergency position system and self-diagnosis system

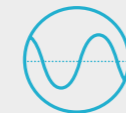

More precision with variable speeds and a guiding isostatic system

Faster to install with no cabling and no welding

More autonomy with automatic preset modes, alarms and patrols

More fluidity with TPM² of multiplexing signals

More flexibility with IP versions and its compatibility with different protocols

² Telemetry & Power Multiplexed

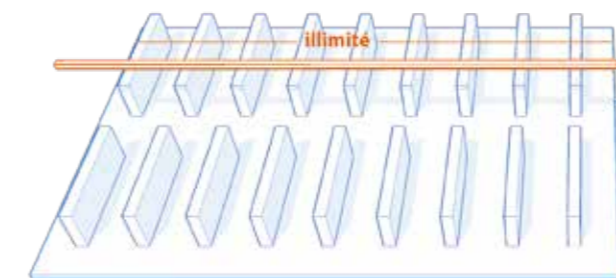

Discreet and unlimited

Invisible, thanks to its double mirror reflective housing, the TUB can be integrated into any environment discreetly. In addition, the TUB camera® is never limited by the length.

100% coverage

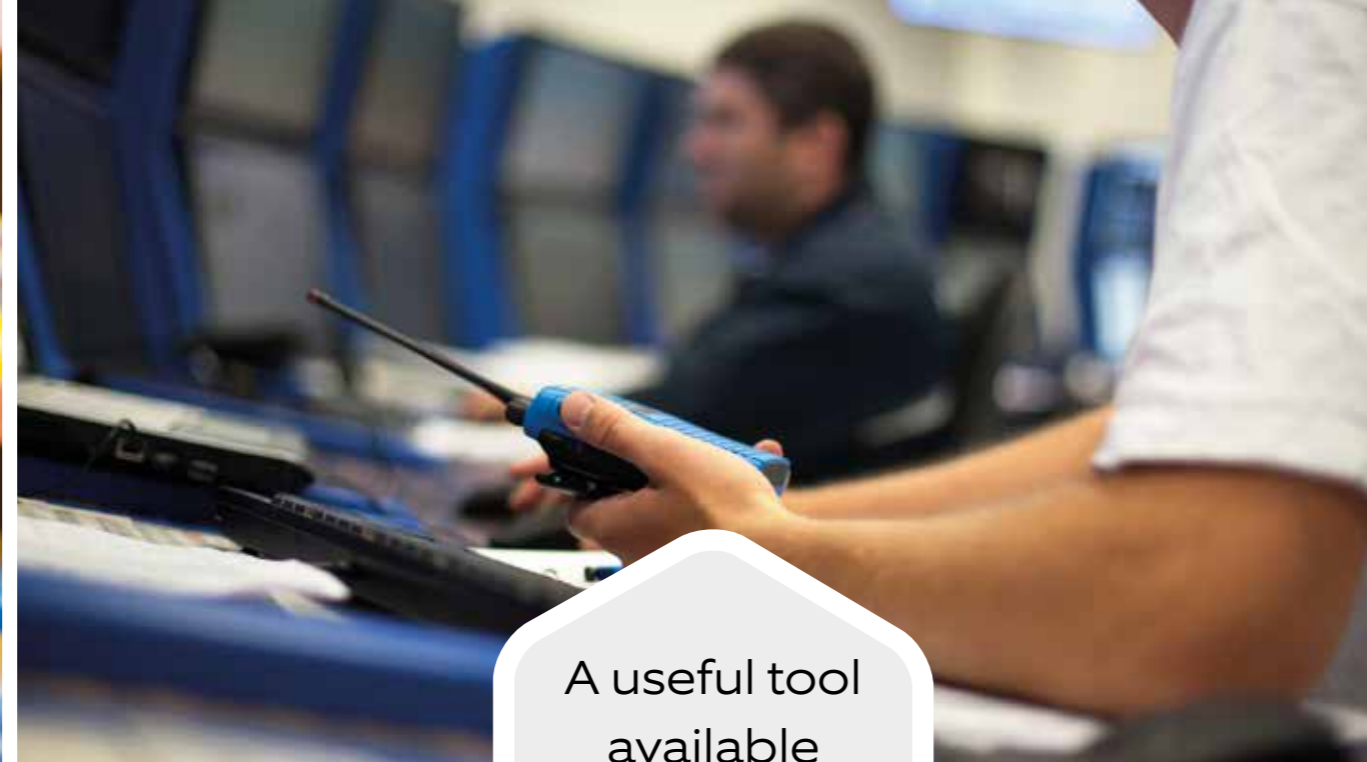

The shuttle camera moves rapidly and precisely within a discreet tubular structure with excellent pan, tilt and zoom functions. Operating in automatic or manual mode, the TUB camera® offers high resolution image in real time. The TUB camera® will be your most effective partner to see **everything that has to be seen.**

TUB camera® solution
The monitored area is unlimited and without blind spots.

Standard solution (domes)
Multi blind spots

A useful tool
available
to security
operators

A guaranteed return on investment

By reducing the number of cameras needed to monitor wide-open spaces, the TUB camera® optimizes operating costs. It guarantees a far faster Return On Investment (ROI) than any other standard solution on the market, especially to fight inventory shortage.

With the TUB camera® the operator is able to control the system more easily, anticipate events and follow all suspicious acts without information loss, increasing therefore efficiency.
100% certain during interventions to obtain immediate results !

Designed for many applications

To protect customers, secure confidential data centers, analyze people movements, control good flows, or even fight against shrinkage, the TUB camera® System is the ideal solution to comply with these needs.

« Made in France » since 1978

Designer and Inventor of the TUB camera® concept, the brand PRYNTEC® of TEB has developed through its R&D department, specific patented technologies. Chosen by a large number of retail chains and international logistics centers, the TUB camera® system is the ideal solution to protect wide-open spaces.

Louis BIDAULT
Inventor of TUB camera®

A story of technology and innovation

From "Eyes of the night" in the 80's, for agricultural surveillance, built on a cable transmission system, to today's wireless system, the TUB camera® continues to evolve. The 10th generation TUB camera® provides customers the best technology, image quality, reliability and durability.
